

Patent Attorney

Description of company

Ericsson is shaping the future of mobile and broadband Internet communication through its continuous technology leadership. Providing innovative solutions in more than 140 countries, Ericsson is helping to create the most powerful communication companies in the world.

To meet demand of our growing business Patent Unit Long Term Evolution (Patent Unit LTE) in Stockholm (Kista) is looking for two talented patent attorneys. We are part of Ericsson's global patent organization and we work closely with Ericsson research in the telecommunication area. The technology is based on our global standardization leadership and the world's strongest IPR (intellectual property rights) for 2, 2.5, 3 and 4G systems. You can be part of the team that is driving the development of an all-communicating world. You can contribute to the evolution of the telecommunication industry. Ericsson offers exciting career opportunities. Have you got the skills we're looking for?

Job description

Ericsson needs to strengthen the Patent Unit LTE with two patent attorneys. In this position you will:

- Retrieve and evaluate new inventions
- Draft applications on your own as well as in co-operation with outside counsels
- Manage prosecution and maintenance of patent portfolios
- Handle oppositions and invalidations
- Actively promote the awareness of the importance of patenting/licensing within Ericsson
- Investigate the validity and possible infringements of granted patents
- Handle questions from the R&D organization regarding IPR matters
- Investigate licensing possibilities for patents in co-operation with our Patent Licensing Unit
- Work in an international environment with opportunity to exchange views and experiences with colleagues in other countries

As a patent attorney you are required to be a well-organized and careful person who takes initiative, can work independently, is flexible and has a good sense of collaboration. You need to be creative and thrive on challenges.

Competence

Formal education

- Masters degree in Engineering

Requested competence

- At least 3 years of patent experience
- Very good knowledge of data and telecommunication technologies
- Good knowledge of Swedish, European and international patent law and practice
- Very good analytical and communication skills
- Very good language skills, written and spoken, in mother tongue
- Very good written and spoken English

Expected competence

- Ericsson is focused on being the world-leader with regard to IPR and licensing. As such, the company expects all its Patent Attorneys to have the necessary skills and qualifications. If you are not already a European Patent Attorney, having passed at least some parts would be a distinctive advantage and Ericsson expects your commitment to invest your time and energy to reach this goal.
